## professional experience

Thoughtworks - software development consultant

december 2021 - now

- Accelerated product development cycles by constructing a scalable software platform for a major insurance company in the US. Reduced the average implementation time by 75%.
- Improved customer onboarding by developing an account opening application for a financial services company in the US. Reduced user onboarding time from days to minutes.
- Built and maintained 2 complex web applications using React and TypeScript, adhering to accessibility standards (WCAG).
- Contributed to full-stack development by collaborating on backend microservices using Spring Boot and Kotlin.
- Implemented robust testing strategies using TDD, Jest, and React Testing Library to ensure code quality and reliability.

Probono Digital - software engineer

june 2020 - august 2021

- Developed and maintained cross-platform applications for web and mobile using React and React Native.
- Built scalable backend services with Node.js and Express.
- Implemented efficient CI/CD pipelines to accelerate delivery.

React-it Solutions - software development intern

july 2019 - june 2020

- Developed and maintained web applications using React and Angular.
- Built robust backend services with Node.js and Express.
- Improved team efficiency by establishing and documenting Git Flow workflows.

## education

University of Brasília - bachelor in software engineering
